

Subject: TeamPoS 3000 80G HDD EOL

Overview

Due to the transitioning of Fujitsu hard disk drive manufacturing to Toshiba, there are many changes that we must accommodate with shorter notices than we are accustomed to. We are immediately transitioning the TeamPoS 3000 XL and TeamPoS 3000 XL² 80GB Hard Drive to an "End-of-Life" status. This short notice is required based on our ability to secure new hard disks and our current inventory. The original drive will be replaced by a 160GB 5400 RPM drive.

Products Affected:

- TeamPoS 3000 XL
- TeamPoS 3000 XT
- TeamPoS 3000 XL²
- U-Serv100
- U-Serv150EX
- U-Scan Genesis
- DeliVision systems that include some of the above.

Parts Affected:

Description	Part #	Comments
OPN TP3K HDD ASSY/2.5"/80GB/5400RPM	11001556	EOL – Use 11002819
HDD/2.5"/80GB/5400RPM	11001364	EOL – Use 11002818
OPN TP3K HDD ASSY/2.5"/80GB/7200 RPM	11002852	EOL – Use 11002819
HDD/2.5"/80GB/7200RPM	11002851	EOL – Use 11002818
OPN TP3K HDD ASSY/2.5"/160GB/5400RPM	11002819	
HDD/2.5"/160GB/5400RPM	11002818	

Also see attached Marketing Bulletin #EOL1004002 for additional details.

Impact

- Production Will cut over to the 160G as 80G HDD inventory is depleted.
- Installed Units No Impact.
- Repair Center No Impact.
- Service Spares Use existing 80G spares as available. Then use 160G spares if 80G no longer available.

Special consideration needs to be taken for Dual Disk and RAID systems. It is recommended that both disks are the same size and if one is replaced with a larger capacity, both be replaced with the same capacity. This can be accomplished by removing the failed disk, copy/recover the data from the remaining disk onto the new disk, then remove the original/good disk and copy/recover the data back onto the second new disk. The good removed disk can be returned to good stock.
