

Subject: WinCLD 2.1.4 Diagnostic

Overview

WinCLD 2.1.4 is now released for support of the new Cash Drawer Port option on the TeamPoS 3600 terminal. All other functionality of WinCLD is unchanged and other terminal platforms are still supported as previous, TeamPoS 3000 XL, XL² and XE. WinCLD 2.1.3 can continue to be used if testing the Cash Drawer Port is not required.

The files are located on the FTP site below

WinCLD 2.1.4 adds support for the new Cash Drawer Port option on the TeamPoS 3600 terminal platform. There are no changes or enhancements to the current TeamPoS 3000 functionality (continues to run WinCLD 2.0). The WinCLD 2.0 files above are included for reference only. All functionality is included in the WinCLD 2.1.4 image files.

In order to effectively run WinCLD, the loop back connectors should be installed to test the peripheral ports on the back of the terminal. Please use the information in the bulletin PSB-08-021A to order the kit that includes loopback connectors and licensed software to run WinCLD from a USB flash drive.

For full installation, update and operation instructions, see the Reference documents above.
