

Subject: WinCLD 2.2.3 Diagnostic – for TeamPoS 7000

Update A:

WinCLD 2.2.3 is now available to be updated onto previous WinCLD Bootable Thumb Drives. The list of documents and software files on the FTP site listed below has been updated. The software files and upgrade document allow for both building a new WinCLD Bootable Thumb Drive and for upgrading an existing WinCLD Thumb Drive to version 2.2.3.

Overview

WinCLD 2.2.3 is now released for support of the new TeamPoS 7000 terminal. All other functionality of WinCLD is unchanged and other terminal platforms are still supported, TeamPoS 3600, TeamPoS 3000 XL, XL² and XE.

The files are located on the FTP site:

<ftp.ftxs.fujitsu.com/pos/possustaining/Retail/WinCLD> Login required

New files on the FTP site:

- WinCLD22Ref.pdf - Set-up/Operation instructions for WinCLD (all versions)
- WinCLD22Update.pdf - Instructions for updating an existing WinCLD bootable Thumb Drive to version 2.2.3
- WinCLD22-USBImage.zip - Full WinCLD 2.2.3 Thumb Drive Image
- WinCLD22-Update.zip - WinCLD 2.2.3 Thumb Drive software update

Previous versions of WinCLD and documentation are also maintained on the FTP site for continuity and archive purposes.

In order to effectively run WinCLD, the loop back connectors should be installed to test the peripheral ports on the back of the terminal. Please use the information in the bulletin PSB-08-021A to order the kit that includes loopback connectors.

For full installation and operation instructions, see the Reference documents above.
